/ PROJECTS

>> Coding Notes Application | React, Firebase, Flutter

- A simple platform that helps user to maintain its coding notes, packed with some useful features such topic wise folder, code syntax highlighter, flashcards & graphical representation.

- Launched globally in mid August 2020 with 350 + users and available on both web and android play store(webview).

- 240+ upvotes on Product Hunt

>> Winner – DCB Bank Hackathon | Truffle, Web3, Solidity, Android, JavaScript

- Developed a PoC for blockchain based instant KYC application, using JavaScript, android and solidity smart contracts.

>> Winner – India Blockchain Week | Truffle, Web3, Solidity, JavaScript

- Developed a PoC for blockchain based identity management, using solidity smart contracts. The same project also received an honorable mention in Proffer Hackathon (IIT – Delhi).

>> Side Projects

- Coding Notes: React, firebase, Flutter, Netify
  Link: https://www.codingnotesonline.com/

- Corona Dashboard : React, Firebase, Netify
  Link: https://corona-meter-dashboard.netlify.app

- Netflix Clone : Next.js, Vercel
  Link: https://netflix-clone-wheat.vercel.app/

- Amazon Clone: Next.js, Redux, Vercel

/ WORK EXPERIENCE

>> INSTAREM- Software Engineer October 2019

- Complete revamp of user onboarding and transaction flow designs of the site. This involved creating several reusable components that can be used on all other country corridors.

- Improved performance and reduced frontend application size using react optimization techniques.

- Implemented toggle feature to launch new designs for specific countries.

- Implemented the error handling capturing events on analytics tools like Google tag manager and Clevertap.

- Worked on several features of a mobile app which is built on react native.
